Presbyterian Student Association - Dinner and a Movie

Tuesday, the 15th, we are beginning our annual January Tuesday nights of dinner and a movie. This week's movie is Proof of Life with Meg Ryan and Russell Crowe. We begin at 6:30 p.m. Come join us! 582-5600

New ISP and Possible Service Disruptions

On December 18 the Information Technology Staff completed the cutover to our new Internet Service Provider, NewSouth, and added a second T1 line to connect Wofford's network to the Internet. The addition of the second T1 line will effectively double the bandwidth of our Internet connection, which should improve our Internet performance.

During January and February, the Information Technology staff will be working on the pilot testing phase of the new Windows/Exchange 2000 Network Services system. This will involve testing and maintaining our new equipment, which could lead to unavoidable service disruptions in web access and email. We will reserve the following times for unscheduled outages:

Monday evenings from 9PM to midnight
Saturday and Sunday mornings until 11AM

Outages will not always occur at these times, but we will make them our target times for work on the network that potentially involves service disruptions. If we need to schedule outages for other times, we will make every effort to work during non-peak need hours, such as weekends and nights, but sometimes may not be able to avoid problems during the day. We will announce all planned outages through the Wofford daily announcements and apologize in advance for any unplanned service disruptions that do occur. The Information Technology Help Center, at extension 4357 (H-E-L-P), will be the best source of information for questions about service outages. Please report network problems to the Help Center so that we can deal with them as quickly as possible.

Voice Mail Working

Voice mail is working again. However, there are a few things to be aware of.

1. We were unable to restore any messages you may have had in your mailbox. However, the system will still report that you have new and old messages. If you attempt to listen to these messages, you will not hear any actual messages. The system will simply ask you to save or delete each phantom message. You will need to press delete each time, until all phantom messages are cleared, in order for the system to correctly report the number of new and old messages in your box.
2. Message waiting lights and stutter dial tone will behave somewhat differently from here on. Previously, message waiting indicators were cleared as soon as you checked your box, regardless of whether you listened to and disposed of all your new messages. Now, lights will stay on and stutter dial tone will still be active until you have handled (saved or deleted) every new message in your box.

If you have any questions, please contact the Help Center at ext. 4357 or by email: help@wofford.edu.
