To: Wofford Students (WoffordStudents@Wofford.Int) WoffordStudents@Wofford.Int, Wofford Faculty/Staff (WoffordStaff@Wofford.Int)
WoffordStaff@Wofford.Int

To all of the Wofford family, friends and community,

Merci Beaucoup, Muchas Gracias, Suurkiitos, Danke Schön, Molte Grazie, Terimakasih Banyak, dōmo-arigatō-gozaïmasu, Thank You very much. I tried to think of as many ways as possible to let you know of our enormous gratitude. These are my last moments as President of this great student body and words cannot begin to express what you have meant, not only to me, but to all my courageous delegates and assembly members.

We, the 2003-2004 Wofford Campus Union Assembly, have dedicated the past year of our lives to improving student life on Wofford's campus across the board. We have been faced with obstacles that have made us stumble, but through it all we have never and will never fall. I believe that God places us in miraculous situations so that out of those situations we can become miraculous people. The accomplishments of Fred Byers, Dotty Strobel and the Social Affairs Committee have been nothing short of miraculous. The dedication that Steven Blanton and the Facility Affairs Committee have shown has not come shy of that miraculous mark. Chris Shugart and the Campus Relations Committee have helped to bring the college and its students together on a level that's nothing short of miraculous. To my Treasurer John Hackney and the Facility affairs committee who made sure we had enough money to finance the miraculous. To Secretary Meg Beacham who made sure that all of our meetings were documented with miraculous precision. To my Vice- President Josh Whitley who made sure that the internal affairs of the assembly continued to function in a miraculous manner. To Josh Raffini our distinguished Parliamentarian who made sure that all of our meetings were not in good order, but miraculous order. To our passionate and dedicated advisor Dean Roberta Bigger who made sure that if we were not at the miraculous she would see to it that we got there shortly there after.

All my remarkable delegates passed legislation and moved the student government to the next level. You are the miraculous heart and soul of this body. To President Dunlap and his miraculous staff who, as he might say, truly define all that a Terrier can be. To the whole Wofford staff, faculty, administration and students, I say thanks for your miraculous support. So if anyone ever asks you what word best describe your college, your home, your community - you make sure you tell them that Wofford can be described in no other words than- miraculous. Thanks again.

Sincerely,

J.R. McNair
Wofford Student Body President

Guest Speaker: Dr. Frank Johnson, Neuroscientist

Dr. Frank Johnson, a professor in the department of psychology and program in neuroscience at Florida State University, will be on-campus to give two talks:

How does behavior influence our genes?

Monday, March 8 at 2:30 PM in the Olin Theater – Refreshments served at 2:15 PM in the Olin Lobby

Dr. Johnson's research focuses on the relationship between genes and behavior, with the important twist that he is interested in determining how behavior influences gene expression, and possibly the structure and function of the brain. Dr. Johnson will discuss the view that genetic mechanisms that determine the structural and functional capacity of the brain are under behavioral regulation.

Endogenous Cannabinoids: What Are They Doing in the Brain?

Tuesday, March 9 at 11 AM in the Science Auditorium (RMSC 110E)

Cannabinoids are the class of drugs found in marijuana, which have their effects by interfering with endogenous cannabinoid signaling in the brain. The role of endogenous cannabinoids is not well understood but may be related to voluntary motor function, learning, and memory. Johnson's lab has found that the mRNA encoding cannabinoid receptors (CB1) is highly expressed in the zebra finch brain regions for song learning and that levels of the CB1 receptor are highest in juvenile birds. Dr. Johnson will discuss his investigation into how cannabinoids affect the ability of juvenile birds to learn to sing and the development of song regions.

Dr. Johnson's visit is sponsored by the Cultural Affairs Committee and the Psychology Kingdom.

How does behavior influence our genes?

Guest Speaker: Dr. Frank Johnson, Dept. of Psychology & Program in Neuroscience at Florida State University Monday, March 8 at 2:30 PM in the Olin Theater – Refreshments served at 2:15 PM in the Olin Lobby

Dr. Frank Johnson's research focuses on the relationship between genes and behavior, with the important twist that he is interested in determining how behavior influences gene expression, and possibly the structure and function of the brain. Dr. Johnson employs the Zebra Finch songbird model to examine the interreaction between learning songs and the underlying neural physiology. Dr. Johnson will discuss the view that genetic mechanisms that determine the structural and functional capacity of the brain are under behavioral regulation.

Sunday Service of Worship

Sunday Morning Services of Worship - held in Mickel Chapel, these services feature a traditional liturgy and include hymns, readings and litanies, lectionary lessons and a sermon.

Great Oaks Hall Furniture

The Roger Milliken Science Center is visited on a regular basis by people from other colleges as well as alumni, perspective students, and business people coming to see our new facilities. The Great Oaks Hall is normally the center piece to any such visits.

Wofford students are encouraged to use the hall for individual or group study and the furniture has been arranged to suit the student's needs. It is understandable that the students may occasionally feel the need to move the furniture from it original location, but we ask that you please return the furniture to its proper place when you are finished studying. The furniture is too cumbersome for the housekeeping staff to try to move back every morning. Thank you in advance for your cooperation.

Mosaic

Mosaic is a worship experience that weaves together music, film, art, prayer and a message. Sundays at 7:00 pm, McMillan Theatre in the Campus Life Building.

The Classical Music Library Available

The Classical Music Library is now in our library's catalog:

This new service contains some 20,000 pieces of music which can be played through your computer's speakers. Access takes only a few seconds and other applications may continue while the music is playing. You may search by composer, genre, instrument, artist, conductor, and period. Biographical and other reference materials are also available. Works included range from the medieval period through the twentieth century and the collection is expected to expand by 2000 tracks each month. In addition to playing a selection through your PC, users may also purchase either a download or CD from the service.

You can find The Classical Music Library by searching BEN, the online catalog, or at http://library.wofford.edu/search/t?classical_music_library, or for the present by clicking on the violin icon on the Library's opening page. Wofford's contract permits three simultaneous users, so if you have difficulty accessing the service, wait a few minutes and try again.

Colleagues,

Although we did not succeed in offering our Risk and Liability Management Workshops this past month, please accept the attached copies of notes that I have taken during December workshop conversations with Dr. Powers, Dean of Students for the International Education of Students (IES) and with representatives of the Educational & Institutional Insurance Administrators (EIIA).

Some of what is included will seem to be obvious and many of you have very solid good practices in place as you build your projects. The attachment is intended to inform and suggest. Please address your questions and observations to me at wisemandm@wofford.edu or at 4510.

Thank you,

General Guidelines for Off-campus Study/Travel Projects:

Please keep these suggestions in mind as you prepare your Interim projects for 2005.

As you formulate your international study/travel project or your off-campus study/travel project, EIIA and IES urge most strongly that your question be:

Q: What is the reasonable question to ask when formulating my project's policies?

A: If this trip involved your child, how would you do administer your project?

- I. **Orientations:** All study/travel project orientations (and there **must** be one) should address local as well as US laws on food, drugs, and drink. Build a requirement in which the student must research the environment into which they are going.

- II. **Contractual obligations, travel, and your responsibilities:**
 - a. **Two Sponsors:** Have two faculty or responsible adults with the group, door-to-door. Do not travel by yourself with your students from the US to your destination. You may have your second sponsor waiting for you at the end of your outward journey, but you must also have a second supervising adult with you at all times.
 - b. **Course description:** your academic background is generally considered to be solid. BUT you are not a professional travel agent -
 - Housing, safety, travel modes (inform yourself in order to appropriately inform students and parents). Provide what you promise (youth hostel is not a last minute substitute for a promised 4 star hotel)
 - Write transportation standards (bus, car, airplane).
 - Investigate the Association for Safe Int'l Road Travel and the Global Road Safety Toolbox.
 - Do not arrange for student volunteer drivers.
 - The college, the professor, is not required to provide transportation to class functions. **Do not** arrange or facilitate the arrangements for transportation (Do not ask: "Will any of you (students) volunteer to drive?" – now you (faculty) are responsible for the condition of your volunteer drivers' cars, seatbelts, insurance, drinking and drug use etc.) Minimize your responsibility:
 - "The Bowling class takes place at Star Lanes. Students who choose to enroll in this project are

responsible for their own transportation to the site of the class.”

c. You and Students: Health and Safety: SAFETY BY DESIGN, NOT ACCIDENT

- i. In travel, the faculty sponsor is the college – student services, advising, counseling, judicial, medical – you must understand the rights and responsibilities that go along with this new status. Students and parents expect this (rightly or wrongly).
- ii. Faculty sponsor must have access to the medical report, not just the Statement of Good Health. Do not exclude students with health issues; coach them to deal with the new environment.
- iii. Faculty sponsors must be knowledgeable about local practices or must always be accompanied by local, knowledgeable resource person
- iv. Be aware that US law travels with you too: Title IX, FERPA, ADA, etc.
- v. Faculty & alcohol: Do not drink with students
 1. On any day or night of your study/travel project, one of the adult sponsors should abstain from any consumption of alcohol.

III. Academics

- a. Define the learning goals that the trip addresses and define how you will assess that learning. (SACS)
- b. Build and limit expectations: Your project literature and orientations must clearly explain your sense of your responsibilities, obligations, and rights as well as those of the students. Your syllabus and description reveal an academic project. You must deliver what you promise.
- c. Integrate language about drugs, alcohol (Student Code of Rights and Responsibilities & Honor Code).

IV. Student Behavior and Responsibilities: Students want boundaries and they want to be assured that you will enforce them.

- a. All of your printed materials as well as your project website must indicate that your students continue to be governed by the Student Code of Rights and Responsibilities as well as the Wofford College Honor Code. Does it emphasize: Tell students how you will enforce all of the above.
- b. Consequence of inappropriate behavior: Once a student is disciplined and sent home, the student is no longer associated with the college; the college is not responsible for the student, nor for the airline ticket to get the student home, nor for other ill fortune.
- c. Address Supervised and Unsupervised time during travel projects. Risky activity: your description and syllabus must address such things as bungee jumping on free time, swimming on free time, renting cars for a jaunt around Rome, Let’s go watch an anti-war demonstration in Paris” -- Let’s not.

Hip-Hop and Postmodernism: Talk on Tuesday

Ever wonder what postmodernist music would sound like? Guess what. You hear it nearly every time you turn on MTV.

As part of the postmodernist conference this week, Bill Bush from the American Studies department of the University of Texas, Austin, will be here on Tuesday, March 9, to talk about hip-hop as a variety of postmodernist art. His talk will include images taken from hip-hop music and other music genres (punk, for example).

If you have any questions, contact Clayton Whisnant, x4550, whisnantcj@wofford.edu

Cannabinoid Receptors: Why do we have them?

Cannabinoids are the class of drugs found in marijuana, which have their effects by interfering with endogenous cannabinoid signaling in the brain. The role of endogenous cannabinoids is not well understood but may be related to voluntary motor function, learning, and memory. Dr. Frank Johnson's lab has found that the mRNA encoding cannabinoid receptors (CB1) is highly expressed in the zebra finch brain regions for song learning and

that levels of the CB1 receptor are highest in juvenile birds. Dr. Johnson will discuss his investigation into how cannabinoids affect the ability of juvenile birds to learn to sing and the development of song regions.

Endogenous Cannabinoids: What Are They Doing in the Brain?

I would like to convey my heartfelt thanks and gratitude for the many ways I have been so honored in the in the past few weeks. The dinner, reception party, phone calls, e-mails, cards, and gifts have revealed how blessed I've been to have worked with such a caring staff, faculty, parents and all of the students who have chosen Wofford to further their education. May our leaders continue the vision to make sure that Wofford remains at the top of the list of small colleges in our nation. Your friendships and my memories will be treasures forever.

It is free and open to the public.

"An Evening with Madame F" depicts the wrenching survival story of women musicians in Nazi concentration camps through music, song and drama.

Stevens draws on her background as a concert pianist, actress and classical vocalist to create innovative one-person musical theater. Among her other programs are "Lewis and Clark and Me," developed for the bicentennial of the Lewis and Clark Expedition; and "A Table Before Me," and "In the Puppeteer's Wake," pieces that incorporate her family background, period music and theatrical styles, and marionette artistry to convey the tumultuous events that affected refugees during World War II.

Since 2001, Stevens' tours have included a variety of venues in New York City, Boston, Providence, Baltimore, Louisville, San Antonio, Richmond and Washington, D.C. National Public Radio and PBS have produced full-length broadcasts of her works. She has received grants from the International Theater Institute and an Interdisciplinary Artist Grant from the national Endowment for the Arts. She has been a resident artist in Hungary at RS 9 Szinhaz in Budapest, at the Baltimore Theater Project and the MacDowell Colony, among others.

The daughter of Holocaust survivors, Stevens is a graduate of Vassar College and the Rubin Academy of Music. She received her doctorate in piano from Boston University.

Dear Faculty Colleagues:

The Advocates for Ministry Program of the Presbyterian Church (USA) is an effort to encourage outstanding college students to consider pastoral ministry in a church among their vocation options or a trial year at a seminary of their choice. The program invites students to a dinner to hear pastors share the joys of pastoral ministry and to engage in a discussion. The program is ecumenical, but gives a priority to Presbyterian Church (USA) students. All expenses are paid by the program.

We have been asked to participate in the program, and a committee has been formed to facilitate the effort. We need your help in identifying promising students to invite to the dinner as measured by academic ability, people skills, leadership skills, emotional maturity, and moral character. It is anticipated that most of these students will not have previously decided to enter seminary or ordained ministry, but are not closed to it as a possibility for their future.

Please send the names of students you believe should be invited to the dinner to me via e-mail. I will contact them personally. I would appreciate receiving the names by Tuesday, March 30.

Thank you,

Ron Robinson

Night and Day at Wofford College--class visits

This message was put in everyone's CPO, but we wanted to make sure we covered all the bases.

For the past few years, the Night & Day program has offered accepted students the opportunity to experience Wofford from the inside. The students will be arriving on Sunday, April 18, and we will provide dinner and an on-campus activity for them. They will then spend the night in the dorms and attend morning classes on Monday, April 19.

One of the most influential things that these students experience while on campus is their visit to one of your classes. Students who attend the Night & Day program never cease to be impressed by the classes they attend and the faculty members they meet.

We really need your help to make this program successful! We are planning for the prospective students to attend 8:30, 9:30, or 10:30 classes on Monday morning. If you have a class during that time and would be willing to have a few prospective students join you, please let us know.

We'd like to know the time of the class, the title of the class, and how many visitors you'd be comfortable with. At your earliest convenience, please contact admissions counselor Jenni Lister either by phone (4135) or through email (lijsterj@wofford.edu). Thanks in advance for all of your help.

Good Friday Holiday

As has been college policy for many years, Good Friday is observed as a holiday for college administrative personnel. In most years, Good Friday occurs during a week during which the college is otherwise open and fully functioning, so administrative offices are then asked to maintain at least enough staff to keep offices open. However, this year, Spring Holidays occur during the week leading up to Easter, so there will be virtually no students or faculty on campus. Therefore, I am authorizing college offices, where possible, to close for Good Friday, April 9, enabling all staff members to enjoy the same day off. Offices requiring basic staffing for essential or emergency purposes should permit staff members having to work to have an alternate day off.
