PLEASE SUPPORT MULTIPLE SCLEROSIS RESEARCH

On September 18 and 19, a group of friends and I will be joining approximately 2,000 other cyclists on the MS 150 Bike Tour, a journey to work toward an end to the devastating effects of multiple sclerosis. We will ride from Camden to Florence, SC on Saturday (70 miles) and from Florence to North Myrtle Beach on Sunday (80 miles).

Multiple sclerosis is a chronic, unpredictable disease that attacks the central nervous system. Symptoms may be mild, such as numbness in the limbs, or severe, such as paralysis or loss of vision, and they can vary from person to person and from time to time in the same person. Today, more than 400,000 Americans (my sister among them) have MS. While there is no cure for MS, thanks to advances in research (funded in part by events like the Bike Tour) there are now four medications that have been approved by the FDA for treatment of relapsing/remitting forms of MS.

Until a cure is found, the National MS Society will continue to offer help and hope to people with MS and their families. The Society and its network of chapters nationwide promote research, educate, advocate on critical issues, and organize a wide range of programs, including support for the newly diagnosed and those living with MS over time.

While you may not be able to hop on your bike and ride with us, you can still be a vital part of our team by supporting us with your contribution to the National MS Society. Please help me reach my personal fundraising goal of \$1000. Your donation is tax deductible, and every dollar counts. Please consider matching my own donation of \$25.00. You may send a check to me, payable to the National MS Society, or you may choose to pledge on line at <http://www.nationalmssociety.org/> (click on "Pledge/Sponsor a Participant" near the top).

Please do not hesitate to contact me with any questions about the MS 150 Bike Tour or the National MS Society. I appreciate your support, and I'm looking forward to the ride.

Best wishes,

Tim Schmitz (Team: Hobnobbers)
