Do Men Differ? -- Galton, The Bell Curve, and the Talented Mr. Summers
By Dr. J. E. R. Staddon
James B. Duke Professor of Psychological and Brain Sciences, Professor of Neurobiology, and Professor of Biology, Duke University

Dr. Staddon is interested in the evolution and mechanisms of learning. He has published an extensive array of books and research articles in the fields of psychology, biology, and philosophy. This talk should be of interest to everyone interested in gender differences, genetics and behavior, the controversial book "The Bell Curve", science policy, and the controversial statements made recently by the president of Harvard University.

Dr. Staddon's research has also involved timing and memory, feeding regulation, and the ways in which pigeons and rats adapt to reward schedules. Experimental work involves individual animals in computer-controlled environments, where they manipulate the reward and stimulus conditions and try to understand the dynamic processes that allow animals to adapt to these changes. Recent experimental projects have involved time discrimination, recurrent choice and the effects of sequences of stimuli. Theoretical work involves both analytical and computer-simulation studies of functional and mechanistic models for behavior. Recent projects are, for example, a diffusion model (with Dr. Alliston Reid) that describes the dynamics of stimulus generalization and spatial navigation, a parallel model for the assignment-of-credit (response-selection) problem in operant conditioning, a nonlinear dynamic model for operant behavior, a model for the dynamics of feeding behavior and a habituation-based model for memory and interval timing.

For more information, contact Dr. Alliston Reid -4642

In keeping with the liturgical calendar, the Newman Club Catholic Fellowship is offering the Wofford community another opportunity to watch Mel Gibson's *The Passion of the Christ*, a traditional and very intense cinematic interpretation of the events of Holy Week. Prof. Dallek regularly appears on many cable and network programs commenting on current events and especially on the American presidency. As you can imagine, Prof. Dallek is in great demand, and we are lucky to be able to engage him through the auspices of our Lewis P. Jones Professor, Dr. William E. 2005 Wofford Folks Fantasy Baseball League

Greetings. Kirk Neely and I have decided to create a Yahoo! Fantasy Baseball League, and you are cordially invited to join. At present, there are two teams in the Wofford Folks league: Kirk Neely and myself (Richard Johnston). The league is capped at sixteen teams, and the computerized draft has been set for 12:00 pm on Saturday, April 2, so please register quickly! You must register before 12:00 pm on Saturday, April 2 if you wish to participate. It will take a grand total of five minutes to register, and registration is absolutely free. (This is not one of those leagues where money changes hands.) Let me emphasize that all are welcome, rookies included. This is a casual league, and you can learn the rules as we go along. I very much hope that you’ll consider joining.

Instructions:
The password for the Wofford Folks fantasy baseball league is BernieDunlap, all one word. You can sign up for Yahoo! Fantasy Baseball on the following webpage: http://baseball.fantasysports.yahoo.com/b1

Click ‘Sign Up Now’ and then log in to Yahoo!. (If you do not have a Yahoo! account, you can create one in about two minutes.)

Click ‘I Agree’ on the Terms of Service page, then click ‘Join Existing Custom or Public League’ on the next page, and then click ‘Join a Custom League’ on the next page.

On the next page, for League Number enter 289125 and for League Password enter BernieDunlap (all one word, and with a capital B and D). Then click ‘Continue’.

On the next page, you’ll be asked to choose a team name and a logo. Kirk Neely has registered as ‘Metaphysics’ and Richard Johnston as ‘The Richard Mongrels’, so be creative. At the bottom of the page, check your e-mail preferences. If you want Yahoo! Fantasy Baseball e-mails sent to your Wofford e-mail address, you’ll have to register and then verify that address.

Now you’re all set. Click ‘Continue’ at the bottom of the page, review your settings on the next page, and then click ‘Register My Team’. Congratulations. Let’s play ball.

Happy Birthday
