Field Botany Is Open to all Interested Students

All you need is a genuine interest and a willingness to tramp through the woods on weekly field trips regardless of what the weather is like. If interested, please call Dr. Doug Rayner at 597-4624.

**Art History Presentation**
Professor Therese Dolan from Temple University will speak on "Music and the Art of Edouard Manet" on Monday evening at 8:00 in the Olin Theater. This important predecessor to the Impressionists sometimes represented the performance and reception of music in his paintings. Other works, not ostensibly about music, offer subtle clues to Manet's awareness of the debates of the time on music and modernity. Professor Dolan's presentation will be illustrated with slide images. It is free and open to all.

Faculty and Staff:

At the end of each school year, the Campus Union assembly takes great joy and pride in awarding the Sandra Z. Casey Award for Most Outstanding Staff and the Faculty Member of the Year Award. As such, discrepancies in the classification of faculty and instructors in the list emailed to you yesterday prompted the Campus Union to pass a proposal last night requiring the recipient of the Faculty Member of the Year Award to be “full time, permanent faculty member”. With that said, a new list of full time faculty has been obtained from the office of the Dean of the College and will be used in an online ballot tomorrow. I apologize sincerely for the misunderstanding and inconvenience.

"Sins of the Mothers: Buck v. Bell & Eugenic Sterilization"

Description:

The excitement that surrounds genetic research today often seems uniquely suited to the discoveries we read about every day. But one hundred years ago, the term 'genetics' had just been coined, and a similar euphoria swept through the halls of science. Then it was thought that genetics would tell us the secrets of heredity, and eugenics, as one version of applied genetics was known, would guide us toward a future in which society could be engineered to overcome illness and evil. This lecture will focus on the eugenics movement of the early 20th century in America, and one of its most infamous moments: The U.S. Supreme Court case of Buck v. Bell. That case endorsed the eugenic sterilization of a woman who was thought to be "feebleminded" and unfit.

Wofford placed 12th in the field of 16 teams in its first appearance in the national tournament.

Wofford won the Region 5 Championship in February, defeating 14 other teams to qualify for the nationals.

Ingram, a mathematics major from Florence, S.C., was one of the eight All-Stars for the tournament that included 73 players from teams from throughout the country. He earned that spot as the third-highest individual scorer, with a total of 730 points and an average of 48.67 points per game.

Ingram’s competitors described him as “very intense but very courteous at the same time – an uncommon combination,” when nominating him for the sportsmanship award. “He’s friendly, genuinely interested in other people, and respects the game,” another said. “An absolute Southern gentleman.”

Rounding out the Wofford team were juniors Benjamin McCraw of Inman, S.C., and Melia Brannon of Taylors, S.C., and freshmen Tejas Doshi and Vedhas Doshi, both of Moore, S.C. They are coached by Dr. Natalie Grinnell, Dr. Mark Byrnes and Matt Cathey, all Wofford professors.

**Art History Talk Monday Evening: Titian's Nudes**

On Monday evening, May 2, at 7pm in the Olin Theater, Irene Trevor (University of Houston) will give a talk entitled: “Unveiled Images: Mythology and the Female Nude in the Art of Titian”

Titian is the Renaissance artist most closely associated with sensuous portrayals of the female nude. Some of his most famous nudes occur in a series of mythological pictures painted for Philip II, King of Spain. These works are, on the one hand, erudite depictions of classical myth, and, on the other, unabashed celebrations of naked flesh and the female body. Professor Trevor will consider this complex duality, examining Titian's work in the context of the intellectual and artistic culture of Renaissance Italy.
