Global Health Week: Rx for Survival

This week is Global Health Week and tonight the six part NOVA documentary series Rx for Survival will begin at 9pm on PBS (Channel 16) and will air in two hour segments through Thursday. This television event looks at the most critical and emerging threats to global public health and chronicles the leaders who, against all odds, deliver the goods. If you would like more information on the subject of global health be sure to check out this week's TIME Magazine's special coverage of global health issues (available in the library) and listen to Morning Edition and All Things Considered on NPR (90.1 FM) this week as they devote airtime to the challenges and triumphs of keeping the world healthy. Every 8 seconds, someone dies of AIDS. We can do something about that, but first we need to understand the complexity of the problems, where we are coming from, and where we want our dreams to take us. For more information on the series, global health, or how to get involved, please visit http://www.pbs.org/wgbh/rxforsurvival/.

Dear Colleagues,

Basking in the glow of a glorious 2-win season in the Terrier Tag intramural, I’m soliciting volunteers to fill the faculty and staff intramural soccer squad – now and forever known as “Tenacious D,” our Terrier Tag moniker.

So far we have four “athletes” signed up (“athletes” composed of the over-the-hill, if-I-were-only-thirty-pounds-lighter, I-used-to-be-marginally-fast-fifteen-years-ago variety):

1. Representing the Physics Department and star quarterback of the Terrier Tag squad: Mackay Salley
2. Representing the I.T. Department and sporting all manner of knee and ankle braces: Chris Myers
3. Representing the Religion Department and playing keeper: Dan Mathewson
4. And our secret weapon, representing the English department, ex-pro soccer player: Jim Neighbors (we’re expecting LOTS from Jim)

If you’d like to play, drop me an email ASAP.

Thanks,

Dan Mathewson

P.S. As a member of the Religion Department, I can assure everyone that God will be on our side for the duration of the soccer season. I make no promises once the season’s over.

Early Decision Scholar's Day will be held on the morning of Saturday, November 19. This is one of the most important days of the year in the life of the college. Faculty play a vital role with their help in the interview process. If you would like to interview at Early Decision Scholar's Day, please contact Thom Henson at hensontm@wofford.edu or ext. 4133.

Thinking about Grad School in the Humanities?

Are you considering going to graduate school in English Literature, History, Religion, Art History, Philosophy, Political Science, Sociology or another area of the humanities or the social sciences?

Or, as an advisor, do you know a student who is considering further studies in these areas after leaving Wofford?

If so, please keep in mind a class that is being taught next semester: HIS 389 Modern Intellectual History. Students in the class will be introduced to a lot of key concepts and theories that one encounters in graduate study today, for example structuralism, postmodernism, poststructuralism, gender theory, queer theory, and deconstruction. In the process, we will read works by important twentieth-century thinkers such as Martin Heidegger, Jean-Paul Sartre, Roland Barthes, Michel Foucault, Jean Baudrillard, Jacques Derrida, Kate Millet, Joan Scott, Eve Kosofsky Sedgwick, and others. Students will find that having some early exposure to these thinkers will be invaluable in graduate school.

This course is taught as a 3-hour-long seminar course offered on Tuesday afternoon (2:30-5:30). It is reading intensive with a heavy writing component (weekly reactions and several papers). The work load makes it appropriate for Juniors and Seniors.

For more information, contact Dr. Clayton Whisnant, or you can take a look at a syllabus from two years ago: http://webs.wofford.edu/whisnantcj/his389.htm

Learning Community: A World on the Edge

Freshmen and Sophomores: Please be aware of a learning community opportunity in Spring 2006: "A World on the Edge: Philosophical Perspectives on Contemporary Science." In these linked courses, we will explore philosophical questions that arise as we study science relating to potential cataclysmic or apocalyptic events. Some of this science is within humanity's control, such as overpopulation, pollution, dangerous scientific experimentation; and some we have little control over, such as the possibility of an alien invasion or deadly comets.

As we study the science behind these phenomena, the related philosophical issues will include individual responsibility, human nature, sustainable living, environmental awareness, and how to find hope and meaning in one's own life even in the face of potential world disaster. Students will explore philosophy and science through reading, discussion, and experiential learning. The course will feature field trips, guest speakers, and hands-on labs. The primary goals of this learning
community are: 1) To highlight science, not as the sole cause or solution to our world's major problems, but rather as an active participant and potential ally in today's struggles; and 2) To give each student the knowledge and thinking tools necessary to make informed decisions about how to live in today's world. For more information, see the learning community's website at http://webswofford.edu/reynoldsml/

The linked courses are: Phil 120 C (Dinkins), Phys 104 A and 104AL (Zides). Any student wishing to register for either of these courses must register for both. Please be aware that freshmen will be given priority in these courses. After freshmen have completed registration, any remaining slots, if any, will be made available to sophomores.

A Neurobehavioral Analysis of Taste Function: Lessons from Rats and Mice.

Tuesday, November 15, at 11 AM in the Olin Theater

Everything an animal eats must first pass the scrutiny of the taste receptors. Thus, taste plays an irrefutable role in survival. It is also likely that chemosensory systems are complicit in many of the abnormalities associated with eating and drinking. Rodents have been used as animal models to understand how the brain encodes and processes taste signals. Dr. Alan Spector from the University of Florida will talk about ways in which taste sensations in nonverbal animals can be inferred through the application of properly designed psychophysical tasks. Some examples of the effects of neural manipulations on taste perception in rodent models will also be discussed.

Director of Residence Life or the Dean of Students before they reserve a room or advertise a sale. The policy stated below is written in our handbook.

SALES AND SERVICES
All on-campus sales and solicitations must be operated or sponsored by a chartered student organization and must receive the proper authorization. Sales and solicitations in any area (student rooms, apartments, porches, lounges, offices and other common areas) of the residence halls must be approved in writing by the director of residence life. Sales and solicitations in other public and common areas on campus must be approved by the dean of students. In the past, students have provided services for a fee such as babysitting in residence hall areas as defined above. Babysitting and other service activities can be health and safety issues when infants, toddlers and other non-students are in the residence halls. It is potentially dangerous and disruptive. Students cannot conduct such activities in any area of the residence halls as defined above or any other common areas on campus.

Operation Christmas Child
Operation Christmas Child

Join Twin Towers and FCA to help give a needy child overseas as happy of a Christmas as you'll have. Fill a shoebox with hygiene items like washcloths, toothpaste, toothbrush, etc. and toys like small stuffed animals, jewelry, matchbox cars, etc. Use your own shoebox or pick one up from Lyn Pace's office upstairs in campus life. Time is running out! These boxes are due by Friday morning to Lyn's office.

If you don't have time to do this and still want to help, FCA is taking a group to Charlotte on Saturday, December 3, to the Operation Christmas Child headquarters, to help them package and ship the boxes! They plan on leaving about 3:30 and working at the headquarters in Charlotte from about 5:00-10:00 PM.

If you have questions, email jordanpl@wofford.edu or smithjb@wofford.edu.

Twin Towers Angel Tree

Adopt a needy child in the Spartanburg area this Christmas. DSS provides Wofford a list of 60 children and their wants and needs list this Christmas. Right now, only 18 have been adopted. Twin Towers is asking for your help to give one of these kids a great Christmas! We are suggesting a minimum of about $40 to cover one child's list. Adopt one yourself, go in with a group of friends, or sponsor one with your department or organization. Email jordanpl@wofford.edu with your contact information and the number of kids you or your organization would like to sponsor. The list will be sent to you as soon as possible, and the gifts are due to Lyn Pace's office upstairs in Campus Life by December 9. If you want, you can wrap them, but if not, Twin Towers will wrap them for you.

Diversity Dialogue - The Hip Hop Generation

Join us in a lively discussion and demonstration of Hip Hop. Ever wonder about the lyrics? What about the nick names? What about the style of clothes? Why is Hip Hop influencing people around the world? Come and find out. Thursday, November 17, 2005 from 11:30 to 12:30 pm in Shipp Hall Lounge. Join Cosmas Chivandire as he leads this dialogue.

Our basketball team has an important game tonight, Wednesday as we play the Pirates of East Carolina. Your contribution through the years has been critical and we would appreciate everyone coming out tonight at 7:00pm in the Benjamin Johnson Arena. I have said many times that when our students are there in full force, it’s an incredible atmosphere and our facility is as difficult for an opponent to play in as any in the Southern Conference. Our guys will play extremely hard and compete always, but I want, as has been the case in previous years, for our opponents to feel as though they are competing against all of us, the entire Wofford community.
