**To All Faculty and Staff:**

Student Affairs and Campus Safety welcome you back to campus for the Fall semester. Our new students check-in Wednesday, Sept. 2. Traffic on the campus drive will be one way – from Church Street to Memorial Drive. No parking will be allowed on the curb at the Burwell Building or the Carlisle-Wallace House. Employees are encouraged to park in lots on the perimeter of the campus. Upperclassmen return on Saturday so we expect traffic on Evins Street and the campus drive to be congested. Faculty and staff members are reminded that they may call Campus Safety if they need a ride from a parking lot to their office. Officers can be reached 24-hours a day, seven days a week at 864/597-4911.

Best wishes for a successful semester.

## Today's Events

**Opening Convocation - Santee Cooper Series on Sustainability & Energy. Speaker: Christine Ervin, "Inventing Our Sustainable Future."**

**Date/Time:** 9/10/2009 11:00:00 AM

**Location:** Leonard Auditorium

**Details:** Christine Ervin will explore trends that are converging in unprecedented and sometimes alarming ways. Those same drivers, however, are also fueling waves of innovation in the historically slow-to-innovate energy and building sectors – the very sectors that will play

starring roles in a new sustainable economy. As president and CEO of the U.S. Green Building Council, Ervin led its growth from 200 members and three staff in 1999 to become a highly influential coalition of nearly 5,000 companies and organizations, 50 staff, and 70 local chapters and affiliates. Over her five-year tenure, the Council launched the LEED green building rating system – the nation's de facto voluntary green building standard – and the Greenbuild international conference and expo. She was appointed by President Clinton to serve as assistant secretary of energy for the \$1 billion portfolio of clean energy programs in transportation, buildings and industry. Initiatives included the EPA-DOE ENERGY STAR partnership and the Million Solar Roofs program. Ervin also directed the Oregon Department of Energy.

### **Wofford Will Host High School Football Tonight**

**Details:** Wofford will host Spartanburg High School football TONIGHT. Evins Street will be congested from 6 until 7:20 p.m. and from 9 until 9:45 p.m. Consider parking in lots not along Evins Street if you plan on leaving or entering campus during those times. Please also remember to lock your car doors and not leave any valuables in your car.

### **Village Parking**

**Details:** Parking is tight at the Village but we are working on that. Starting Monday morning, a crew will start work on expanding the current gravel lot. Campus Safety asks that students not park along the dirt edge of the lot that runs behind 340. Please also be considerate and not block or restrict traffic flow in the lot. Do not park in front of fire lanes or gates and do not park on the mulch or landscaping. Blocking fire lanes and access gates is a serious safety issue. Please do not park on the timbers that mark the limits of the rows. If the lots are full please park in the gravel lot on Evins Street or the Shipp lot. Please be patient and remember that the College is working rapidly to expand the lots.

The film, Red Gold, is a stunning mosaic of photography, land and seascapes, and real people's stories. At the headwaters of the two largest remaining sockeye salmon runs on the planet, a proposed mine may require the largest dam ever constructed to contain the toxic runoff. Native, commercial, and sport fishermen oppose the proposed Pebble Mine, while mine officials argue the case for development of the mine, which has an estimated value of over \$300 billion. At stake is a unique way of life that would not exist if the salmon didn't return with Bristol Bay's tide. Red Gold is a different kind of environmental documentary—it gives all sides of an issue a chance to be seen and heard. Winner: Best Environmental Film, Taos Film Festival; People's Choice, Banff Mountain Film Festival.

The film, Red Gold, is a stunning mosaic of photography, land and seascapes, and real people's stories. At the headwaters of the two largest remaining sockeye salmon runs on the planet, a proposed mine may require the largest dam ever constructed to contain the toxic runoff. Native, commercial, and sport fishermen oppose the proposed Pebble Mine, while mine officials argue the case for development of the mine, which has an estimated value of over \$300 billion. At stake is a unique way of life that would not exist if the salmon didn't return with Bristol Bay's tide. Red Gold is a different kind of environmental documentary—it gives all sides of an issue a chance to be seen and heard. Winner: Best Environmental Film, Taos Film Festival; People's Choice, Banff Mountain Film Festival.

This message is to inform the campus community about a reorganization that occurred early this summer involving the Web Office and Information Management. In order to better utilize the skills present in both the Web Office and Information Management, it was decided that the Web Office would move from the Office of Communication and Marketing and become part of Information Management.

More recently two additional changes were made affecting this department.

1. Craig Sudduth '09 (ext 4174) was hired as Coordinator of Web Content. He will be the main point of contact for web needs throughout campus.
2. Brian Jinwright has accepted a position with SRC Corporation based in Raleigh, NC. We wish him the best in his new endeavor.

Thank You,
