**Santee Cooper Lecture on Climate Change**

What happens when a geologist and a batik artist collaborate around the topic of climate change? Join us Tuesday, October 20th at 7:00pm in Leonard Auditorium, Main Building, for our fall lecture, *Global Climate Change: A Primer*, sponsored by Santee Cooper Lecture Series on Sustainability and Energy Issues. This event is free and open to the public.

We welcome Dr. Orrin H. Pilkey, professor emeritus of geology, division of earth and ocean science at Duke University, and Mary Edna Fraser, South Carolina low country batik artist as they discuss the topic of global climate change.

Pilkey is an internationally recognized expert on geology of barrier islands and a public advocate on science-related issues. As a team the two have lectured around the country to talk about the greenhouse effect and the damage it causes accompanied by Fraser’s large batiks depicting the arenas in which climate change plays out.

Wofford College and Santee Cooper, South Carolina’s state-owned utility, formed a partnership in 2010 to create the Santee Cooper Lecture Series on Sustainability and Energy Issues. Speakers spend time on Wofford’s campus in downtown Spartanburg and at the college’s Goodall Environmental Studies Center on the Lawson’s Fork Creek in Glendale, S.C. The Santee Cooper Lecture Series on Sustainability and Energy Issues brings speakers from around the world, giving them a platform to discuss timely and pressing environmental issues with Wofford faculty and students, as well as students from the Spartanburg County public school systems and interested citizens.

---

**Martha’s Garden to be dedicated during Homecoming 2015**

The dedication of Martha’s Garden will be held at 10:00am, October 24th, in memory of Martha Cammack ’13, ENVS major and Kappa Alpha Theta sister. The garden is located in the green space across from the Pavilion and next to Lesesne Hall.

PROFILE OF THE WEEK:
Pace University – Environmental Law Program

Pace Law School’s environmental law program is consistently ranked by US News & World Report as one of the top programs in the nation. Located in White Plains, NY, the school offers both graduate degrees and JD degrees in a variety of specialized law and joint degrees.

There are more than 40 environmental law courses offered through Pace University’s Global Center for Environmental Legal Studies, Energy & Climate Center, and Land Use Law Center for Sustainable Development. Pace has an international environmental law program and “hosts numerous initiatives, institutes, and programs with an international focus” and partners with institutions aboard to give students opportunities to study environmental law internationally. Clinics and externships are also available to students for developing practical skills and professional job experience.

For more information on their program, visit http://www.law.pace.edu/environmental-law-program.
