Duke Energy asks Carolinas customers to conserve electricity for the next 24 hours

- Turn off unnecessary lights and postpone household chores, where possible, that involve the use of electricity

CHARLOTTE, N.C. – As temperatures across the nation continue to plummet to historic lows, Duke Energy officials are asking the company's customers to conserve power during the next 24 hours, as extreme temperatures continue.

Below are some steps customers can take:

- The thermostat is a real culprit of higher winter bills. To help save energy and money, select the lowest comfortable setting when home, and bump the thermostat down a degree or two when leaving home.
- The ceiling fan in the home is a great way to stay cool in the summer – and warm in the winter. Simply set the fans to operate in a clockwise direction, which pushes warm air back down into the room.
- Leave your drapes or blinds open to allow the sun's rays to warm the house.
- Inefficient heating can also add to monthly power bills during colder temperatures. One of the easiest things customers can do to support heating efficiency is to change air filters regularly. A dirty air filter makes a heating system work harder, which uses more energy.
- Find these and other tips at [www.duke-energy.com](http://www.duke-energy.com). Just click on the "save energy and money" link.

Customers who experience an outage should call Duke Energy's automated outage-reporting systems for their respective utility:

- Duke Energy Carolinas: 1-800-POWERON (1-800-769-3766)
- Duke Energy Progress: 1-800-419-6356

Customers may also report an outage or view current outages online at [www.duke-energy.com/storms](http://www.duke-energy.com/storms).

If you lose power, please turn off as many appliances and electronics as possible. This will help with restoration efforts as it will reduce the immediate demand on the power lines when power is restored.

Once your power is restored, wait a few minutes before turning your equipment back on.

Headquartered in Charlotte, N.C., Duke Energy is a Fortune 250 company traded on the New York Stock Exchange under the symbol DUK. More information about the company is available at: [www.duke-energy.com](http://www.duke-energy.com).

Speakers will briefly (10 minutes) discuss their future career goal(s), special training they may need, and any difficulties they have experienced along the way. The students are always interested and excited to hear from a relevant population. If you are interested in speaking to groups at McCracken Junior High School, Carver Middle School, and/or EP Todd, please contact Sissy Kimbrell, Program Coordinator at [EGKimbrell@spart7.org](mailto:EGKimbrell@spart7.org) or call 864-541-4698 as soon as possible. W

Dear Colleagues,

I am writing to provide you with an update on the search for the next Vice President for Development at Wofford College.

The search advisory committee met on Monday, January 13, and selected candidates who are being invited to participate in confidential preliminary interviews with the committee later in the month. These candidates were chosen from a larger number of individuals whose background and experience seemed especially consistent with the candidate qualifications and qualities established for the search. On completion of these preliminary interviews, we will select one or more candidates who will be invited to participate in more extensive on-campus interviews in February.

The committee is extremely pleased with the quality of our semi-finalist candidates and we approach the upcoming interviews encouraged by the breadth and depth of experience that so many of these persons present. As we learn more about the individuals remaining in the pool, we are reassured about the quality of leadership from which we can choose. If you have questions about the search, please feel free to contact me or David Beacham at either [SamhatNH@wofford.edu](mailto:SamhatNH@wofford.edu) or [BeachamDM@wofford.edu](mailto:BeachamDM@wofford.edu). I will write to you again with another update following the late-January interviews.

My best,  
Nayef

Re: Inclement Weather Policy

This is a reminder of Wofford College's inclement weather policy:

Wofford College ordinarily does not close because of weather that brings snow and ice to the area. Every effort will be made to hold classes and to have offices open. Commuting students and employees should understand that classes are held, but that they are to run no unreasonable risk to get to the campus. Students will be expected to make up missed work.

If an exception is made to this policy, local radio and television stations will be notified, and notice will be given via the Wofford Web site, Wofford Facebook page, and Wofford Emergency Alert System (Rave), if appropriate.

If there is no cancellation or delay notice on these sources, it is safe to assume that the college is open and conducting classes as usual.
