Tricks and Treats at Goodall
by Mia Girardi ’22

Last weekend the Goodall Environmental Outreach program hosted a Halloween event for the community. This was the second event our program has held at the Goodall Environmental Center at Glendale, and it was a great success!

In the Halloween spirit, we invited kids and their families to come in costume to experience Glendale in a fun and educational way. We were lucky to partner with the Spartanburg Science Center who brought reptiles for the kids to see and learn about. This was a great opportunity to add to the Halloween theme while also providing an educational opportunity!

We also had a bone activity where the children were able to have hands-on experiences learning about the anatomy of many animals! Our other activities included a Glendale Scavenger hunt and an art station. Even the labyrinth at Glendale was made into a station which the kids loved. It was great to see so many parents and children out at the Goodall Center.

Our Outreach program targets the Glendale and Spartanburg communities. Our Halloween celebration was a great way to invite faculty and their children as well as families from the Spartanburg community to our beautiful Goodall Environmental building!

Each month we host a fun community-centered event. This November we are looking forward to hosting a day camp for kids at Glendale. It has been great sharing the Goodall Center with the Wofford and Spartanburg community and we thank everyone for coming out to the Halloween event, it was a blast!
Upcoming Events and Opportunities

**River Birch Clean-Up Day:** Join PAL and Trees Coalition to clean up our beloved trails. Events are planned all year and the community is invited to help keep our trails clean and beautiful. [Sign up for the next clean-up day.](#)

**South Carolina Wildlife Federation Scholarships:** Full-time students currently pursuing degrees in any environmental field at South Carolina schools of higher education are eligible to apply for this $500 scholarship.

**Family Day at Glendale Shoals:** ENVS Outreach Interns will be coordinating and leading several activities for children. Volunteers needed before and during the event. Contact Mia Girardi, girardiml@email.wofford.edu.

**Waste and Recycling Intern at Wofford:** Do you have a passion for zero waste and interested in learning more about the waste and recycling industries? Do you want experience helping to coordinate a waste and recycling program here at Wofford? This intern will help to manage waste and recycling-related programs, including but not limited to recycling communications, checking on and servicing select specialty recycling streams such as, Comingled, Cardboard and Composting. Contact Rick Shehan, shehanrd@wofford.edu, for more information.

**Campus Plant Records Intern at Wofford:** Working with the horticulturist to document, organize, map, tag, and share information about the Wofford campus plant material. Using a web-based mobile-friendly program we will create a unique web page for each of the plants that include our plants story. The goal is to connect the beautiful Wofford campus plants to campus visitors. Contact Stewart Winslow, winslowsp@wofford.edu, for more information.

**Job Opportunities at Teton Science School**

**PROFILE OF THE WEEK:**

**Tufts University – MS in Sustainable Water Management**

Tufts University’s professional master’s degree in Sustainable Water Management (SWM) is a 12-month program that prepares students for professional careers in the water sector.

Students can choose between four program tracks in Water Diplomacy; Water Infrastructure for Human Settlements; Water, Food, and Energy; and WASH in International Development and Humanitarian Response. This chosen track will direct the student’s secondary coursework and summer practicum.

With over five decades as a center of environmental leadership, Tufts has cultivated a dedicated water studies program that includes faculty and experts that collaborate with academic and real-world settings.

_The SWM degree continues to expand the water conversations at Tufts with a new and exciting opportunity for students which enables them to pursue a variety of futures within the water discipline._
